

koi

(not a whitepaper)

January 2024

## **1. Introduction**

Koii is a network for the people who use the internet, by people who want to help them earn passive income.

Koii is a network of people like you, all around the world.

Anyone can run Koii on their personal devices.

Any developer can build apps that use those devices.

We have built the first platform for collaborative economics, and we invite you to join.

## **2. Try Koii**

Koii is easy to use, that's the point.

There are two ways to get involved:

### **a) Run a Koii Node**

It takes 5 minutes or less to get set up, and there's no upfront investment required.

Try now: [koi.network/node](https://koi.network/node)

### **b) Build an App**

Collaborative economics means using communities to host servers and store databases.

Koii apps can be written with any software language, and require no special skills.

Learn more at [docs.koi.network](https://docs.koi.network)

## **3. Tokenomics and more**

The Koii docs portal is always up to date with the latest information about our next-generation distributed technology.

Visit [docs.koi.network](https://docs.koi.network) for more.

## **4. Where's the rest?**

Whitepapers are for snobs and academics. Koii is for average people.
